WORK EXPERIENCE

XCS Holdings Pte. Ltd. - Singapore

Jun 2023 - Feb 2025

Software Engineer - Remote

- Developed multiple React.js and Next.js web applications, collaborated with the design team to translate UI/UX design wireframes into high quality code using Figma and AdobeXD and created responsive email templates.
- Engineered and optimized dashboards and SPAs by building dynamic, interactive UI components, dramatically improving usability, user engagement and performance across diverse platforms.
- Integrated third-party APIs, including Google Maps, to deliver location-based insights, empowering users to explore nearby amenities and make data-driven decisions, enhancing overall user satisfaction.
- Contributed to the UI development for blockchain, e-commerce and NFT platforms, delivering high-performance, visually compelling digital experiences that adhered to modern design standards and boosted user interaction.

Fiverr

Aug 2022 - Dec 2024

Frontend Engineer - Freelance

- Delivered 10+ projects from concept to completion based on Figma wireframes, utilizing React.js, Next.js, JavaScript, HTML, SASS and Tailwind CSS, consistently earning 5-star ratings for quality and timely delivery.
- Enhanced and optimized existing codebases, driving performance improvements and ensuring seamless user experiences across various client projects.

Helfertech - Pakistan

Sep 2021 - Oct 2021

Web Developer - Intern

- Developed 5+ projects using HTML, CSS and JavaScript, enhancing foundational skills and gaining a deeper understanding of frontend technologies.

EDUCATION

University of Engineering and Technology, Lahore

Oct 2019 - May 2023

B.Sc Computer Engineering

Ideal Group Of Colleges, Sheikhupura

Sep 2017 - May 2019

Intermediate in Computer Science

PROJECT WORK

- **Gym Exercise Web App:** Designed and developed a responsive React.js app with Tailwind CSS, integrated APIs and engineered reusable components for streamlined exercise tracking.
- **ShipFair:** Developed a React.js and Firebase platform for peer-to-peer package delivery, connecting users with travelers for efficient local logistics.
- **Covid-19 Tracker:** Built a real-time tracking application using React.js, integrated with APIs and various React libraries to display global and local COVID-19 statistics, ensuring accurate and up-to-date information.

SKILLS

Programming Languages: JavaScript, Java, SQL

Tools and Technologies: React.js, Next.js, Firebase, Node.js, HTML, CSS (SASS, Bootstrap, TailwindCSS)

Databases: MySQL

Version Control: Git, GitHub

Deployment and Hosting: Vercel, Netlify

ADDITIONAL INFORMATION

Languages: English (Professional Working Proficiency), Urdu (Native or Bilingual Proficiency)
