Neelab Umar

Software Engineer – RPA

neelabumer@gmail.com 03210888277 Lahore linkedin.com/in/neelab-umer-08739b20a

SUMMARY

Software Engineer - RPA with experience in validating 70+ APIs and executing 100+ end-to-end test workflows across web, mobile, and healthcare systems. Skilled in Selenium, Java, Python, Appium, UiPath RPA, Power BI, and modern tools like Cypress, Playwright, LLMs, and Playwright Agent. Managed large-scale data migration workflows, transferring 1,000+ client records with complete accuracy and achieved 100% automation report generation.

EXPERIENCE

QA Automation Engineer, GoSaaS *02/2026 – Present*

- Worked as Lead QA on the Shark Ninja project, managing all QA activities including regression testing, load testing, and test case generation.
- Created and validated EDI files to add and verify data across multiple environments, supporting the Order Management module.
- Validated all data points, their mappings, and extracted data from the database for the ALTEL Data Extraction project.
- Validated new Oracle Procurement module features for the SOAK Project, partnering directly with Oracle.

Software Engineer RPA, CureMD *07/2024 – 02/2026*

- Developed and maintained 100+ Selenium/Java automation scripts for CureMD 10G and 11X environments to improve testing efficiency.
- Designed and implemented UiPath-based RPA workflows to automate processes in third-party systems like eClinicalWorks (ECW).
- Led data migration workflows transferring over 1,000 client records with 100% accuracy.
- Utilized Playwright Agent and Windsurf to generate intelligent test cases and accelerate automation development.
- Improved Client Services efficiency by 70% through Power BI dashboards and achieved 100% automation of client report generation.

Automation Engineer, Strategic Systems International *08/2023 – 06/2024*

- Designed and executed 30+ end-to-end automated test scripts to validate core functionality for Flywheel Digital.
- Developed automated API-validation in Selenium Java, verifying JSON responses and backend logic across 70+ APIs.
- Built parallel API automation workflows in Python using REST Assured for faster and scalable execution.
- Validated data integrity and accuracy in ETL pipelines migrating CRM datasets into Google BigQuery.

Intern - Software Engineer RPA, CureMD *06/2022 – 08/2022*

Gained hands-on experience with automation and testing tools such as Selenium/Java and Cypress.

SKILLS

C#, C++, Java, JavaScript, Python, SQL, TypeScript, HTML, CSS, XML, MySQL, PostgreSQL, BigQuery, Redshift, DBeaver, NumPy, Pandas, ETL Pipeline Validation, JSON/XML Parsing, Git, GitHub, Jenkins, Docker, CI/CD Pipelines, Power BI, Excel Automation, UiPath, Healthcare Systems Automation (ECW, CureMD), Bot Deployment & Orchestration, Process Optimization, Playwright Agent, Windsurf AI, LLM-generated test cases, Prompt-Based Automation, AI-Assisted Debugging & Workflow Optimization, REST Assured, Robotic Process Automation (RPA) best practices, API testing frameworks, EDI File Creation & Validation, Order Management Systems, Oracle Procurement Module, Load Testing, Regression Testing

EDUCATION

The National University of Computer and Emerging Sciences, Bachelor of Science in Computer Science

08/2019 – 05/2023

CGPA: 3.02
