PROFESSIONAL EXPERIENCE

Senior Software Quality Assurance Engineer

Techlogix Pvt Ltd · Lahore, Pakistan

Nov 2025 – Present

Oil & Gas — Track n Trace Platform | *Jan 2025 – Present*

- Pioneered AI-assisted QA engineering using Claude (Anthropic) — generating 400+ test cases across 20+ features, achieving a 4× coverage multiplier and reducing test case generation time by ~42%.
- Initiated a Playwright + TypeScript automation framework — defined Page Object Model structure, multi-environment configuration (QA/DEV/DEMO/PROD)
- Designed and executed API test suites using Postman for REST endpoints, including location management, shipment workflows, and backend code removal verification.
- Performed SQL validation in DBeaver across Data DB, Stamp DB, and DWH to verify schema changes, ETL jobs, and data integrity post-deployment.
- Produced full sprint documentation: closure reports, time estimation reports, retrospective decks, and automation planning documents using AI.

Environmental Monitoring Application | *Sep 2024 – Oct 2025*

- Conducted cross-platform functional and usability testing across web, iOS, and Android for a sustainability platform focused on polymer identification in waste.
- Validated database consistency and performed regression testing to verify bug fixes prior to each release.

Software Quality Assurance Engineer

Techlogix Pvt Ltd · Lahore, Pakistan

June 2023 – Oct 2025

Oracle Flexcube – Core Banking (Conventional & Islamic Banking) | *Mar 2024 – Jan 2025*

- Executed end-to-end functional testing for retail and corporate banking modules on Oracle Flexcube, covering both conventional and Islamic banking (Murabaha, Ijara) product lines.
- Authored and managed 150+ test cases through Azure DevOps with full traceability from requirement to execution.
- Tested external file upload integrations and validated data accuracy across Oracle SQL Developer.
- Collaborated directly with developers and client stakeholders for defect resolution and UAT sign-off.

Business Registration System | *Oct 2023 – Feb 2024*

- Executed functional, regression, and UAT test cycles to validate business rules and data integrity for an enterprise shareholder and entity management system.
- Managed defect lifecycle end-to-end in JIRA, ensuring complete test coverage and traceability across all release cycles.

Track and Trace – Product Authentication System | *Jun 2023 – Oct 2023*

- Designed detailed test cases for mobile (iOS/Android) and web portals for a QR-based real-time product validation solution.
- Performed API testing with Postman, scanning validation, and backend database checks against MySQL.
