Maryam Nasir Suleman

+92 3234323051 |Email| LinkedIn |Lahore, Pakistan

SUMMARY

Software Engineer with 2+ years of experience in healthcare software development and quality assurance activities, with hands-on experience in functional, regression, smoke, API, integration, and white-box testing. Skilled in test case design, defect identification, debugging, and fix verification across EHR systems and AI-powered healthcare applications. Proficient in C#, Angular, SQL, and Postman, with a strong understanding of SDLC, STLC, and Agile methodologies.

WORK EXPERIENCE

Software Engineer | CureMD *Aug 2024 - Present*

- Took on dedicated QA responsibilities within the development team, independently testing EHR features developed by other engineers, identifying defects, verifying fixes, and supporting release readiness.
- Performed functional, regression, integration, and negative testing across **4+ clinical and administrative workflows**, including Review of Systems (ROS), Inbox Work Queues, Patient Label Printing, and AI-powered clinical documentation.
- Conducted end-to-end REST API and SQL Server database validation across **3+ EHR modules**, verifying CRUD operations, API contracts, stored procedures, data persistence, and consistency across UI, API, and database layers.
- Validated role-based permissions, patient records, user/location filtering, pagination, HTML/PDF generation, browser printing, and multi-location workflows, covering positive, negative, and edge-case scenarios.
- Identified and debugged cross-layer defects involving API contracts, DTO mapping, SQL queries, null handling, and data duplication, supporting root-cause analysis and fix verification.
- Engineered and integrated enterprise EHR functionality using **Angular, C#, ASP.NET Web API, and SQL Server**, developing RESTful services, complex clinical workflows, and legacy-to-modern application integrations.
- Contributed to **2 AI-powered healthcare solutions (AI Medical Scribe and CureDoc)**, integrating LLM-based clinical documentation across **20 clinical modules** while validating output consistency, data accuracy, and application reliability.

Software Engineer | MA Health House, Australia (Remote) *Feb 2024 – July 2024*

- Developed the **Doctor Help telemedicine platform**, integrating secure WebRTC-based video consultations and AI-assisted clinical workflows to support remote healthcare delivery.
- Collaborated on application development and validation, focusing on clinical workflow functionality, system integration, and platform reliability.

QA TRAINING & PROFESSIONAL DEVELOPMENT

QA Bootcamp | CureMD | 2024

- Participated in QA Bootcamp, delivering training to 50+ participants on testing fundamentals and practical QA workflows.
- Covered manual testing, API testing, and test automation fundamentals

SKILLS

QA / Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Integration Testing, API Testing, White-Box Testing, Test Case Design & Execution, Defect Tracking, SDLC, STLC
Automation & Testing Tools: Postman, REST API Testing, Selenium WebDriver (Basic), Java, SQL
Languages: Python, C++, C#, Java, SQL
Web Development: HTML5, CSS3, Bootstrap, JS, WordPress, Flask, MERN, ASP.NET, REST APIs, MySQL
ML/DL/LLM: LLMs, NLP, Computer Vision, PyTorch, TensorFlow, scikit-learn, Vllm
Other: AWS, Git, Linux, Bash, LaTeX, Jupyter

CERTIFICATIONS

Selenium WebDriver with Java – Basics to Advanced + Frameworks Udemy *2025*
Postman: The Complete Guide – REST API Testing Udemy *2024*

OTHER

BS Thesis Pakistan Sign Language Recognition using DL and CV for deaf people. *2023*
Conference Managed the "16th Int. Conference on AI" as a Director of ACM UET CHAPTER. *2022*
Scholarship Merit based scholarship for 4 years from Government of Punjab, Pakistan. *2019-2023*
Professional Training QA Bootcamp (CureMD) | Manual Testing | API Testing | Test Automation Fundamentals *2024*

EDUCATION

MS Computer Science | UET, Lahore, Pakistan *Jan 2025 –Present*

BS Computer Engineering | UET, Lahore, Pakistan *2019 - 2023*
